ABOUT

Enthusiastic and self-driven Data Science student with a strong interest in AI, Machine Learning, and data analysis, equipped with basic knowledge of ML algorithms and data analytics , looking for an entry-level role to enhance technical expertise and contribute to innovative data-driven projects.

TECHNICAL SKILLS

- **Programming:** Python, Java ,SQL
- **Web:** HTML, CSS, JavaScript
- **Data Analytics & Visualization:** Tableau, Excel
- **AI/ML :** Pandas , Numpy , Scikit - Learn
- **Soft Skills:** Communication, Teamwork, Problem Solving

PROJECTS

Recommendation System for Students - Developed AI/ML models for intelligent recommendation and prediction tasks using Python and Machine Learning algorithms. Implemented data preprocessing, feature engineering, and model training techniques to improve prediction accuracy.

InsurTech - Developed an AI-based predictive analytics system for personalized insurance policy recommendations. Integrated analytics and automation features to enhance operational efficiency and streamline insurance services.

Sales Forecasting System - Developed a Sales Forecasting System using Python and Linear Regression to predict future chocolate sales trends through data analysis and visualization.

Agentic AI - Designed and developed an autonomous Agentic AI system for student career guidance and opportunity discovery. Built AI agents capable of analyzing resumes, extracting skills, and generating personalized recommendations automatically.

EDUCATION

B.Tech CSE (Data Science), Geethanjali College of Engineering and Technology (2023–2027) | CGPA: 8.0/10|

CERTIFICATIONS

- Google Data Analytics Certification - Coursera
- Database Programming with SQL - Oracle | 2024
- Java Fundamentals - Oracle | 2024
